| <b>Multisensory Integration in Mosquitos</b><br><i>Fairhall Lab, University of Washington</i>   | Seattle, WA<br>Oct. 2014 → Now                        |
| I created agent-based dynamical models of mosquito plume-seeking behavior using wind-tunnel flight data.  |   |
| <b>Humpback Whale Census</b><br><i>Kimberley Community Whale Research Project</i>   | James Price Point, Australia<br>Aug. 2012 → Oct. 2012 |
| A community-initiated peer-review of a study conducted by an oil conglomerate at the proposed site of the world's second-largest liquefied gas processing port. Our research revealed gross discrepancies in the original study.  |   |

| I helped establish a method to grow, stain, and image primary dopaminergic neural culture from <i>Drosophila</i> embryos in order to test whether Parkin and PINK1, proteins involved in Parkinson's disease, are recruited to depolarized mitochondria in dopaminergic neurons. This |   |

research was [published](#) in *PNAS*.

### **Organic Synthesis of P450-like Molecule**

*Scudder Lab, New College of Florida*

Sarasota, FL

Sep. 2008 → Nov. 2009

I partially synthesized precursors to a novel high-valent iron-stabilizing macrocycle based on the active site of cytochrome P450.

### **Summer Undergraduate Research Program (NSF-REU)**

*McCartney Lab, Carnegie Mellon University*

Pittsburgh, PA

May 2009 → Aug. 2009

I determined that APC2, a protein with probable roles in colon cancer tumorigenesis, did not interact with  $\beta$ -catenin of the Wnt pathway's destruction complex. I determined that APC2's conserved N-terminal domain was not essential for its proper localization. This research was [published](#) in *Genetics*.

### **GC and HPLC Instrumental Analysis**

*McCord Lab, New College of Florida*

Sarasota, FL

Jan. 2008

An independent study project where I learned how to operate liquid chromatographs and analyze their spectra.
